Upcoming Exam - October 13th

Hi all,

As mentioned in class, we will have our midterm exam October 13th. The exam is **in person, and closed note**. Please bring a pencil and a single sheet of doublesided notes to use during the test.

Expect questions from Modules 1, 2 and 3, which are focused on vocabulary, Phases of Compilation, regular expression, context free grammars, static dynamic scope, binding time, memory organization. Additionally, we will have used Go, Scheme and Javascript by the exam time, so be sure to be able to understand how simple programs work in those languages, and the features of them, especially if those features were used on each programming assignment.

Thanks!

Andre
